

Ionic Stone, a global company with local expertise

Born in 2001, Ionic Stone has become the home for most when choosing natural stone tiles. Our range is carefully selected to the highest standard and quality adding elegance and prestige to each individual setting. This, together with our exceptional customer service & support, ensures successful results every time.

Born in the UK, now around the world

The Ionic Stone foundation that was originally planted in the UK, has flourished into further acquisitions and developments in the UK & internationally. With 40,000 sqft UK storage capacity, the ownership of our own quarry and 60,000 sqft state-of-the-art manufacturing facilities in Turkiye, we have provided materials in various formats for prominent projects worldwide. From Australia to the USA, Middle East to Europe, our products have become part of a lifestyle. Luxurious, innovative, affordable.

Search for perfection never stops

Since 2001, we have been exploring different ways of perfecting stone processing. Our R&D centre in Turkiye has been developing chemicals for stones, fully automated stone manufacturing machines, ERP software to manage inventory and manufacturing, all in the name of creating the most premium, affordable & innovative natural stone products. That is why, our factory is the only factory in Turkiye having been recognised as an innovation centre in its field.

Successful Collaboration

We work in partnership with the most established and reputable companies in our industry. Our partners all around the world help us to source the most demanding materials with the strictest quality requirements set by Ionic Stone. Not just in natural stone, also in porcelain tiles, our partners create unique marble effect porcelain ranges which are parallel to its real counterpart.

TECHNICAL

101

We are pioneers in stone processing

Our own specialised production techniques help us to mass produce unique designs to the market.

Here at Ionic Stone we are able to produce some of the most popular marble tile formats, such as hexagons, trapezoid and chevrons as well as our recently introduced victorian range which showcases a classic and traditional look with unique marble formations.

Our Ion-machines division has also partnered with one of the largest Italian advanced machinery manufacturers of natural stone, ceramics and metals. Breton, will be working in collaboration with Ion-machines to produce modern and efficient state of the art machinery for factory plants.

We are also very pleased to announce the initiative to rely on solar energy for a major portion of the company's electricity consumption in our processing plant in Denizli via the installation of solar panel systems on the roof of our facility.

Projects

Ionic Stone products have been selected for many prestigious projects all over the world.

Sophisticated projects need a strong collaboration of developers, architects & manufacturers to ensure a successful outcome. When any of our products are specified for a project, we guarantee the process is approached with the upmost professionalism from start to finish. With both UK & overseas projects, our team ensures that all parties work together to achieve the desired result. Some prestigious projects for which our products were specified:

CITY OF LONDON, COMMERCIAL PROJECT

Silver Moon marble honed in special pentagon shape.

LONDON DOCK, RESIDENTIAL FLATS

Carrara marble vanity tops, Mayfair black & Carrara metro porcelain tiles, Carrara hexagon mosaics.

GRAND HYATT, QATAR

Lilia marble, 17,000 m², manufactured in 5 months.

MARINA ONE, SINGAPORE

Lilia marble, 12,000 m².

HILTON BAKU, AZERBAIJAN

Lilia & Emperador dark marble.

FINANCIAL DISTRICT, RIYADH, SAUDI ARABIA

Ivory & Noce veincut, cement filled travertine, 12,000 m².

And thousands more of commercial & residential projects, both in the UK & overseas.

Architectural tiles

A new range of high end porcelain products suitable for all tiling specifications in all sectors of the UK commercial market. Working with some of the industries leading innovative manufacturers, to offer a complete portfolio of porcelain tile ranges to suit the architects, interior designer and specification professional.

Deluxe stone range

A selection of distinctive and exclusive marble, dolomite, onyx and limestone products. Producing unique stone solutions which can be manufactured in an array of sizes and finishes seemed imperative as a go to resource for interior designers, property developers and architects. Request your own sample box today.

STEPS WORKTOPS BESPOKE ITEMS

Whatever the specification and quantity, Ionic Stone can fabricate formats and finishes that cater for all your needs; whether they are steps, risers, vanity tops, cut-to-size tiles, or more.

TECHNICAL

General information about stone

Stone is a lifestyle choice. It represents who you are. It's a good choice too, as it is strong, stable and exudes an organic feel that can create a timeless presence in any room. Stone really is the perfect example of how Mother Nature can produce such beautiful things. When you stroke the smooth surface of natural stone remember to appreciate that its process actually began millions of years ago, deep beneath the surface of the earth. Before you fall in love with our range of natural stone it may be worth learning a bit more about 'the nature of stone'. It's an article that details how stone is made and tips on maintaining it.

Things you should know about stone

All stones are different . . .

You need to expect the unexpected as no one tile will be the same as the other. Each tile will exhibit natural and geological variations occurring in terms of colour, markings, texture, and movement in background. These elements may vary from batch to batch. This unpredictability also effects the current production techniques which means even sizes can't be exactly as specified, therefore tolerance levels are set in manufacturing processes.

Samples are for guidance not insurance . . .

Use samples as a guide, not as a guarantee of colour. Samples may not always show full characteristics of a particular stone. For instance, if you are buying a multi-coloured slate, and purchasing it off only a 10x10 sample, you will be quite surprised to see the full display of different colouring inherent in that particular stone. Therefore, we suggest you look at an array of samples or tiles before you purchase stone.

All stone tiles will need sealing . . .

Natural tiles are to a greater or lesser extent porous and need to be impregnated (or sealed). Impregnator will fill all the tiny, small voids/holes that we cannot see in the structure of the stone, which will in turn prevent any other liquids from being absorbed. This way, the stain will sit on top of the surface and will be easy to wipe off.

Why is my stone soaking wet?

Stone tiles are always packed in wet conditions at the factory and cannot properly dry out until unpacked; they will lighten in colour as they dry. It is therefore essential that all tiles are completely dry prior to installation to be able to assess any colour variation present. To check this, it may be necessary to place a tile in front of a direct heat source to see the true colour of the stone when it is totally dry.

Have you considered your wastage?

Always calculate wastage for each project before ordering, for instance minor damage can occur to some stones during transportation, site handling, site cutting and grading. We always recommend an additional 10% to allow for wastage. Our sales staff can help you work this out.

Some corners might be chipped . . .

As much as you don't want to hear that some of your delivery may be chipped, it does happen. Some stones are easily scratched and/or are subject to pitting/chipping. Especially soft limestones will be susceptible to transportation and handling. No matter what you do, you will get some tiles

with minor chippings, scratches etc. Don't worry, as you will always have tiles to cut, so spare them for cutting. Also, some marbles like crema marfil (English translation cream marble) are hard but very fragile. This results in many of them breaking during production. To prevent this, crema marfil manufacturers will employ a technique called "mesh backing/gluing". With this technique, a special thick chemical solution will be applied on the back of the tile to make it more stable. Sometimes you may see some tiles looking cracked, however they just look like that due to its nature and it is okay. Some pitting/voids on the surface are very rarely seen as well, these are considered minor imperfections, and they are also okay. From time to time due to these unpreventable but natural characteristics of certain stones, we may deliver extra quantities up to 5% for each order if we think these imperfections might create a problem in terms of fitting.

Blend, blend, blend . . .

Sometimes, your order might be from different batches. So, we strongly recommend all tiles be blended before installation. Whilst sorting tiles to ensure suitable blending, normal practice calls for segregation of tiles with minor damages or some unusual markings. They can be used where cut tiles are required, or in less visible locations. The installer must

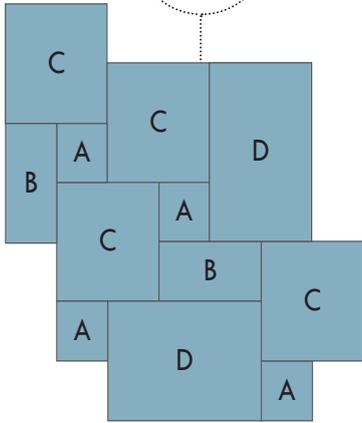

have an understanding of blending requirements or special patterns as part of their skills.

Underfloor Heating

Some products may require special installation methods when used with underfloor heating systems. Other products may not be suitable with underfloor heating systems at all due to their thicknesses or characteristics of the material. Please consult with us if you need more information.

PATTERNS

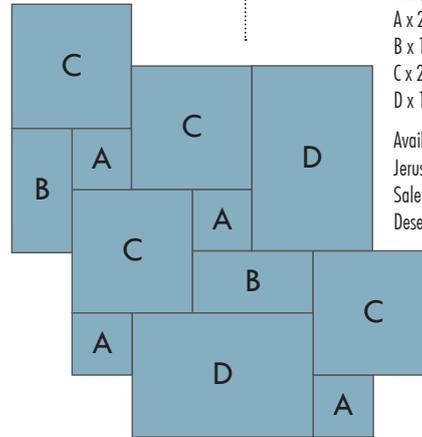

OPUS FRANCO

Sizes:
 A x 2 203x203 mm
 B x 1 203x406 mm
 C x 2 406x406 mm
 D x 1 406x610 mm

Available in:
 Lydia Classico Tumbled
 Lydia Classico Brushed & Chiselled Edge
 Lydia Kremna Brushed & Chiselled Edge
 Silver Tumbled
 Fantastico Brushed Unfilled & Chiselled Edge
 St Moritz Tumbled
 St Moritz Brushed & Chiselled Edge
 Antalya Cream Tumbled
 Sky Grey Tumbled

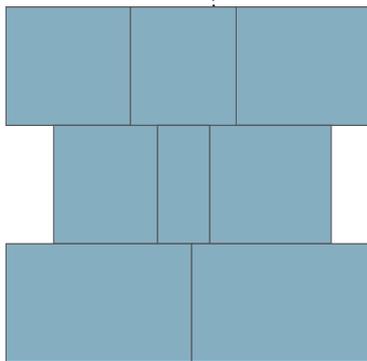

OPUS ROMANO

Sizes:
 A x 2 198x198 mm
 B x 1 200x400 mm
 C x 2 400x400 mm
 D x 1 400x600 mm

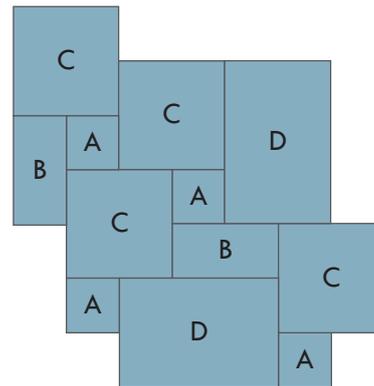

Available in:
 Jerusalem Antique Gold Tumbled
 Salem Gold Tumbled
 Desert Pearl Tumbled

FREE LENGTH

Sizes:
 The width of any tile is the same but the length varies randomly.

Available in:
 French Beaumaniere Brushed
 Montpellier Tumbled
 Irvine Grey Tumbled & Distressed
 Mystique Yellow Tumbled & Distressed
 Dust Grey Tumbled & Sawn
 Odessa Mix Historical
 Oxford Grey Historical
 Riviera Historical
 Moleanos Blue Mix Brushed

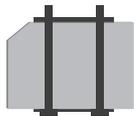

Sizes:
 A x 2 300x300 mm
 B x 1 300x600 mm
 C x 2 600x600 mm
 D x 1 600x900 mm

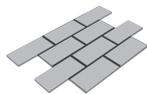

Available in:
 Brazilian Black

GRAND OPUS

ICONS SUMMARY

This symbol represents the materials that are available in slab format. Some of these will be stocked in the UK. Others can be brought in on demand.

Standard-sized tiles stocked in the UK.

This symbol denotes formats which are currently trending in the market.

This indicates that the material is accompanied by mosaics in selection of options.

This icon signifies that decorative formats are also available.

A new and exclusive range of tiles for your niche and bespoke projects.
